REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious a method of finishing a tracked semiconductor wafer having a semiconductor wafer surface and a finishing cycle time, the method comprising the steps of **"changing a plurality of control parameters in response to an evaluation of both the in situ process information sensed with the at least three operative process sensors and the tracked information, wherein changing the control parameters changes the tangential force of friction in the at least one region having the finishing aid during at least a portion of the finishing cycle time"** in combination as claimed in claims 1, 12, 19, 119; **"changing a plurality of control parameters in response to an evaluation of both the in situ process information sensed with the at least three operative process sensors and the tracked information, wherein changing the control parameters changes the finishing rate measured in angstroms per minute in at least one uniform region during at least a portion of the finishing cycle time"** in combination as claimed in claims 37, 56, 61, 76, 97; and **"applying a finishing motion in the interface forming at least one uniform region having the finishing aid and a differential finishing rate measured in angstroms per minute on the semiconductor wafer surface; and changing a plurality of control parameters to change the differential finishing rate measured in angstroms per minute on the semiconductor wafer surface during the finishing cycle time"** in combination as claimed in claim 59.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
